

SIT102 Introduction to Programming

High Distinction Task 9.5: Something Awesome

Overview

For top results in this unit, you need to demonstrate excellent achievement of the unit learning outcomes and generally impress the assessment panel with your achievements. This task gives you the freedom to demonstrate that in any way that you want.

Submission Details

Submit the following files to OnTrack.

- A document outlining what you have done that demonstrates excellent achievement of the unit learning outcomes. This should contain a link to related material.
- A short video outlining the awesome thing you have done

Instructions

There are no shortcuts.

There is no easy way to do this.

It is not a box ticking exercise.

But...

You can do anything you want in order to demonstrate your excellent achievement of the unit learning outcomes.

Here are some examples, each could be awesome if done right.

- An amazing custom program, which demonstrates technical expertise at a very high level.
- Outstanding contributions and reflections in supporting others in this unit.
- A short research project aiming to answer a question related to programming. This could evaluate efficiency of algorithms, or explore advanced data structures.
- Creating a project that combines together aspects of this unit with things you have learnt in other units.

Anything will be acceptable, but we want it to come from you.

Whatever you submit will be assessed as “Complete”, but will be evaluated in your portfolio. **Please note** that marking this task as Complete only indicates that it has been received. If you want feedback on the task, please make sure to add in a comment and the tutor can then respond to you via that. Once you are ready we will sign it off, and evaluate it in your portfolio.

Make sure that what you submit is of a very high standard, both in terms of the details provided and their presentation. This work will be considered for those who are already achieving the High Distinction standard, and when evaluated we will be looking for aspects that demonstrate the highest level of achievement in this unit.
